

Who won the race?!?

Changes made form Phase 1

I changed the times array so that the user would input the values instead of them being predefined.

Testing Program

The program was tested using the same array of numbers from phase 1.

```
times dq 0,0,0,0,0,0,0
timesSize equ $-times
Minvalue dq 0
scanfString db "%d", 0
minString db "The fastest time is: %d", 0
PositionString db "The current positions are: ", 0
```

```
97
86
92
89
84
102
94

The fastest time is: 84
The current positions are: 84
86
89
92
94
97
102
C:\Users\Jerry\source\repos\Assembly\x64\Debug\Phase2.exe (p
To automatically close the console when debugging stops, ena
